Business is changing. You notice it every day. Customer tastes and competitive dynamics change in a heartbeat. Your market is evolving, with customers and prospects in new cities, and maybe even new countries. The way people work is changing, too. But one thing that hasn’t changed is that it’s people who drive your business success. And when every transaction and interaction counts, your people need flexible access to the tools that help them be proactive and productive.

You can scramble to keep up with these changes or you can take control and shape your future. Microsoft is committed to help you upgrade with confidence by delivering a comprehensive vision and solution for your business. Consistent product releases, which are cost effective to deploy and easy to implement at your pace, help you transform your business.

With Microsoft Dynamics GP 2013 you can:

- Transform the way your people work by putting timely information and easy-to-use tools in their hands when they need them, no matter their location.
- Connect the people inside and outside your organization and give them insight and context to drive better decisions and boost productivity.
- Streamline systems, so that your IT team can think about ways to support growth instead of maintaining software.
- Improve your margins and enhance the bottom line, generating cash to fund growth.

Think forward.
The way people and organizations work is changing. Don’t just react to the many changes facing your business, take control and shape your future. With convenient web-access to Microsoft Dynamics GP 2013 you and your team will have greater access to the tools and forward-looking insight you need to work better, faster, and smarter.

Increase productivity.
Microsoft Dynamics GP 2013 will not only transform how you and your team work, but will increase productivity, with compelling new application functionality giving you the ability to access the Business Analyzer from your home page, prepay purchase orders, drop-ship serialized items, track and report fixed assets based on your fiscal year, get rich context on each transaction with document attach, and more!

Stay ahead.
Success is about more than growing your business in the near term. It’s about sustaining profitable growth over the long term. Getting the most out of your business investments directly contributes to this goal. Your Microsoft Dynamics Business Ready Enhancement Plan (BREP) helps you:

- Stay current on the latest and best solution.
- Get more out of your IT investments.
- Chart a technology roadmap that keeps your business on the forefront of innovation.

While Microsoft Dynamics delivers the vision, tools, and support you need to get ahead of changing business conditions and the competition—at the end of the day, you’re in charge. Set the pace that fits your situation. Deploy on-premises, in the cloud, or take a hybrid approach. It’s your choice.

Work more efficiently with web access in Microsoft Dynamics GP 2013 and convenient window preview capabilities.
People drive your business success.

Give them fast, convenient access to the information they need to connect, collaborate, and take control of your future.

Web Access
Provide all of your employees easy access to Microsoft Dynamics GP with the new web client, so they can connect and contribute wherever they are, from their PC or mobile device.

Business Analyzer
Equipped with the Business Analyzer dashboard that is now easily accessible over the web, you and your team will be able to quickly track key performance indicators, anticipate opportunities, delegate tasks, or take informed action. The Business Analyzer delivers role-specific insight across your business, so each member of your team can drill down to relevant details, collaborate with others, and take quick action right from their Microsoft Dynamics GP 2013 home page.

Business Intelligence
Broaden the reach of your business intelligence. Microsoft Dynamics GP 2013 offers both full-service and self-service users a more complete look at the business, with even more out-of-the-box Microsoft SQL Server Reporting Services and Microsoft Excel reports.

Word Templates
Create professional-looking documents like invoices, purchase orders, statements, and more with the Word form templates in Microsoft Dynamics GP using Microsoft Word capabilities. Now, any report can be created using Word templates, eliminating the dependency of modifying the reports in report writer.

Document Attach
Connect relevant context to each transaction. Use the Document Attach capability in Microsoft Dynamics GP 2013 to append informative details, pictures, notes, or contracts directly to a transaction or line item, giving your employees, customers, and suppliers the information they need, right where they need it.
Drive efficiency up while you drive costs down.

Simplify day-to-day functions and processes, and you will decrease operating expenses and improve cash flow.

**Sub-Ledger Reconciliation**
Balance ledgers with ease.
The sub-ledger reconciliation tool in Microsoft Dynamics GP 2013 automatically identifies discrepancies between your general ledger and sub-ledgers, eliminating time-intensive, manual inventory and bank reconciliation processes.

**Expedited Shipping**
Shorten shipping times so your products reach customers faster. Drop-ship serialized items directly from your suppliers to customers.

**Asset Tracking**
Track your assets in the way that works for you. Microsoft Dynamics GP 2013 lets you track and report fixed assets based on your fiscal or calendar year, eliminating one more hassle from the process of creating financial statements and tax filings.

**Improved Purchasing**
Boost purchasing productivity and accuracy. Set specific percentage tolerances that simplify your purchasing process, allowing Microsoft Dynamics GP 2013 to enter quantity overages and automatically close purchase orders left open due to quantity shortages.

**Fixed Asset Historical Depreciation Report**
Assess your assets accurately. With the new Fixed Assets Historical Depreciation Report, you get visibility into historical fixed asset depreciation values, simplifying month-end and year-end closing routines.

**Inventory Efficiency**
Microsoft Dynamics GP 2013 gives you a sharper view into your inventory by assigning unique reasons codes that allow you to monitor and track items as they move through your supply chain.

Balance ledgers easier with the new sub-ledger reconciliation tool.

Simplify and improve the purchasing process with Microsoft Dynamics GP 2013.
