

LIC is Leading The Farm Into The Future

Livestock Improvement Corporation (LIC) is a farmer-owned agri-tech co-op headquartered in Hamilton New Zealand.

Since 1909
100 years of dairy innovations

Over 700
permanent staff

Over 2000
staff at peak season

As part of their innovation-led growth strategy, LIC needed to move their products and services to the cloud.

Challenges

Exceed the service levels of the incumbent

Increase technology stack security profile

Move decades old legacy services

Complete migration in less than six months

Partners & Solution

LIC formed a consortium with Microsoft, Emerging Technology Partners and Umbrellar to implement a solution based on the industry-leading Azure cloud service platform.

Outcomes

180 servers and their workloads migrated in less than 6 months

1 billion-row database transferred flawlessly

Transfer of 100TB scientific archive

Seasonal Flexibility with Year-round Security

The agility that Microsoft Azure provides makes it easy for LIC to quickly scale resources based on demand. And ISO27001 compliance ensures its customers data stays secure.

“The ability to quickly scale infrastructure to meet customer demand is a key advantage of being in Azure.”

Wayne McNee
Chief Executive, Livestock Improvement Corporation (LIC)
